

CODENECTION 2026, PROTOTYPE PHASE

Swipe The Deck. Drag
The Desk. Print The Book.

TOLONGLABS / TRACK 1, LIFESTYLE AND PERSONAL PRODUCTIVITY

THE PROBLEM

Four Causes. Three Are Already Solved.

We are not competing with a travel planner. We are competing with the free apps she already has.

WHO IT IS FOR

One Person Carries The Whole Trip

Every claim about her is marked assumed in the notebook, and none of it comes from an interview.

WHAT SHE CARRIES TODAY

- Reading the whole chat
- Deciding for everyone
- Chasing four people
- Fronting the deposit

Aisyah, 24

WHAT THEY CARRY

Farah

Hana

Iman

WHO WE ARE DELIBERATELY NOT BUILDING FOR

~~“Students”, as a category~~

~~Families with young children~~

~~Backpackers with weeks of slack~~

The mind map for 'Travel planner' is centered on a red box labeled 'Travel planner'. It branches out into several main areas:

- The ideation, drawn** (green box):
 - On stage, four chairs tilted, one left standing.
 - Four chairs tilted, one left standing.
 - Every branch here is something that actually happened in the process of the design - the 'no nothing' is critical to the design. The 'no nothing' is critical to the design. The 'no nothing' is critical to the design.
 - On this with user - 'The process, which draws what a group does that to think.
- One mechanism, three jobs** (blue box):
 - The group votes, and the vote produces the theory.
 - Everything that led between a **redacted branch** already appeared, still on screen.
 - The branch to the past that when we are even tonight.
- Members claim stage and 10 their** (purple box):
 - Members claim stage and 10 their
 - Members claim stage and 10 their
 - Members claim stage and 10 their
- And one problem - 3 legal** (purple box):
 - The next problem thing is a new map, the characters want it, and
 - Something parallel nearly their page.
- And one problem - 3 legal** (purple box):
 - The next problem thing is a new map, the characters want it, and
 - Something parallel nearly their page.
- And one problem - 3 legal** (purple box):
 - The next problem thing is a new map, the characters want it, and
 - Something parallel nearly their page.

Drag anything. Delete nothing.

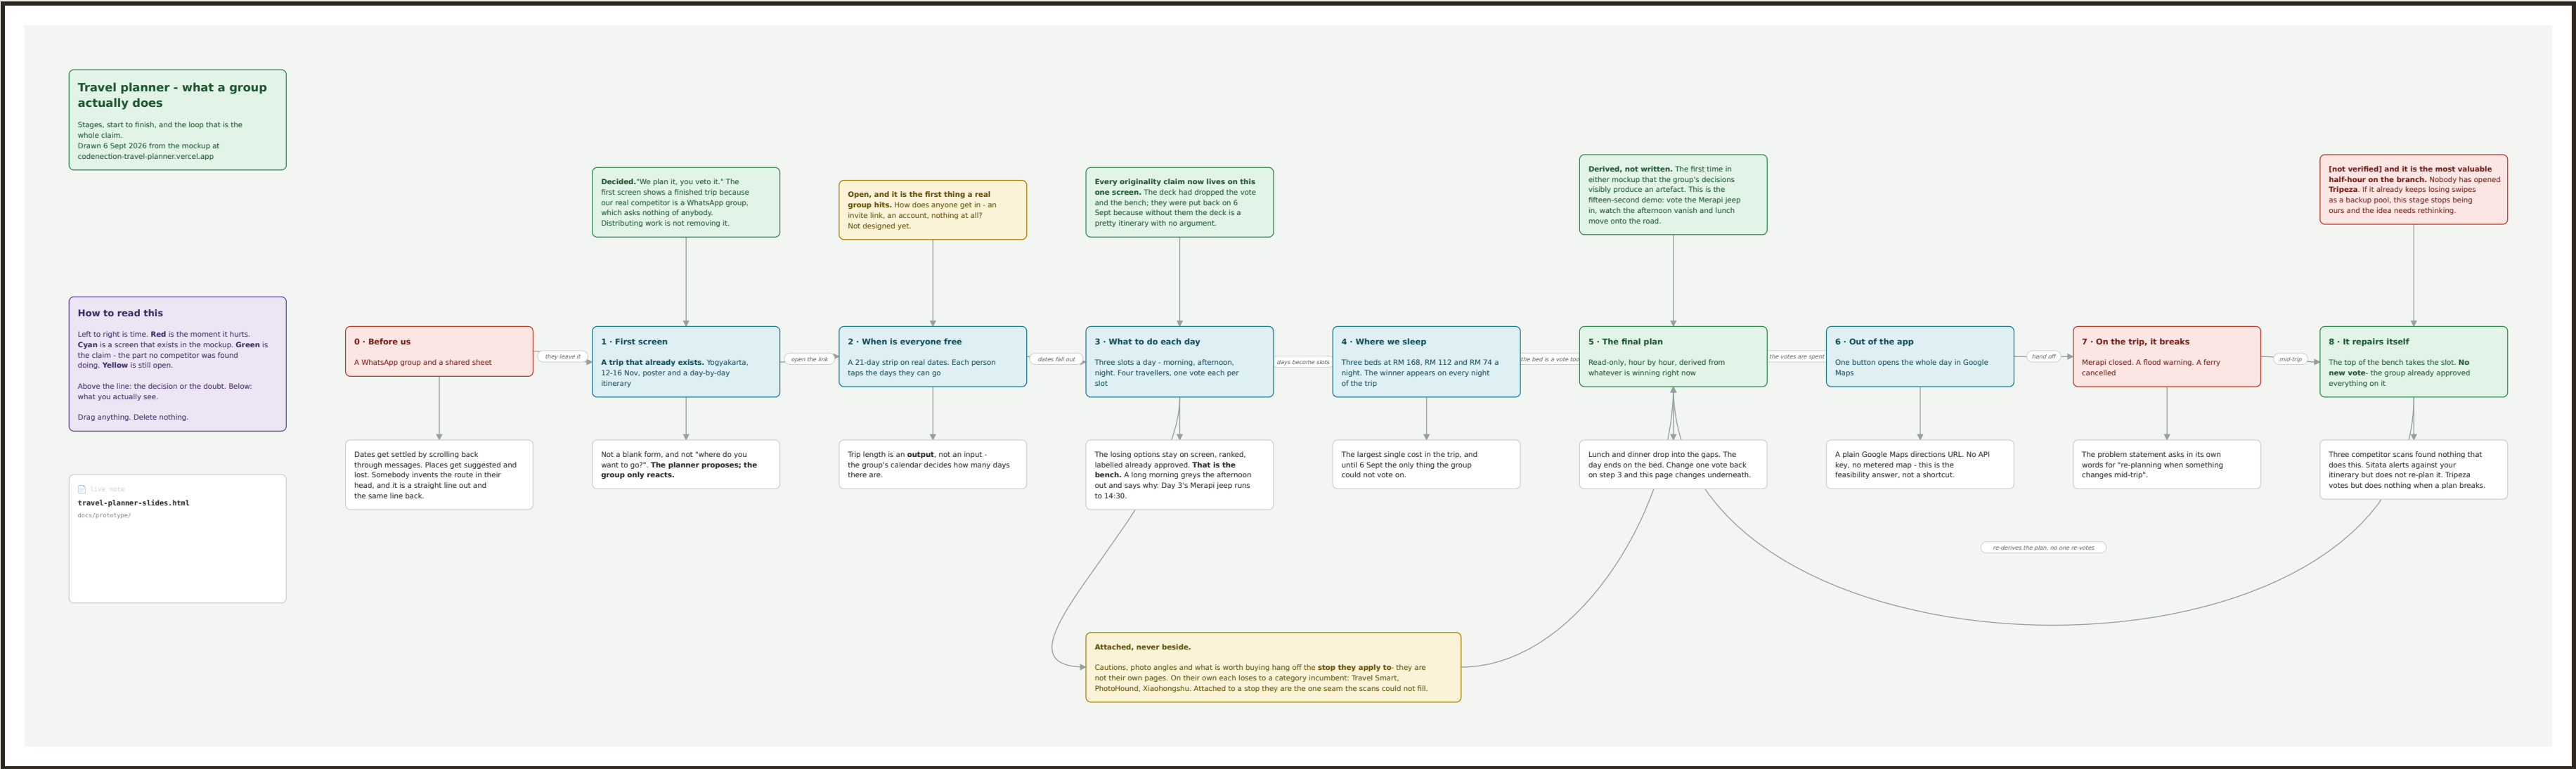

Red is a question still open. **Cyan** is a live branch. **Green** is what survived pressure and is the claim today. **Yellow** is a cost or a caveat. **Purple, struck through**, is a branch we dropped - kept on purpose, because dead ends are scored twice here.

Drag anything. Delete nothing.

What A Group Actually Does

Stage zero to stage eight, and the loop back from a broken plan to a re-derived one.

Thirteen Directions. Two Survived.

Every one is dated, and every one names what killed it. Nothing was deleted.

THE DIRECTION

- Split planning, members claim days
- Map-first planner, round-trip decision
- Group voting as the originality claim
- All-in-one platform as the argument
- Photo spots as a feature
- One book in two states
- A chat panel for planning
- The self-repairing itinerary
- The interview instead of a form
- Bill splitting
- A mascot copilot
- The trip as a book, read-only
- Swipe on reels, drag what won

WHAT KILLED IT, IN THE NOTEBOOK’S OWN WORDS

HOW LONG IT STAYED LIVE

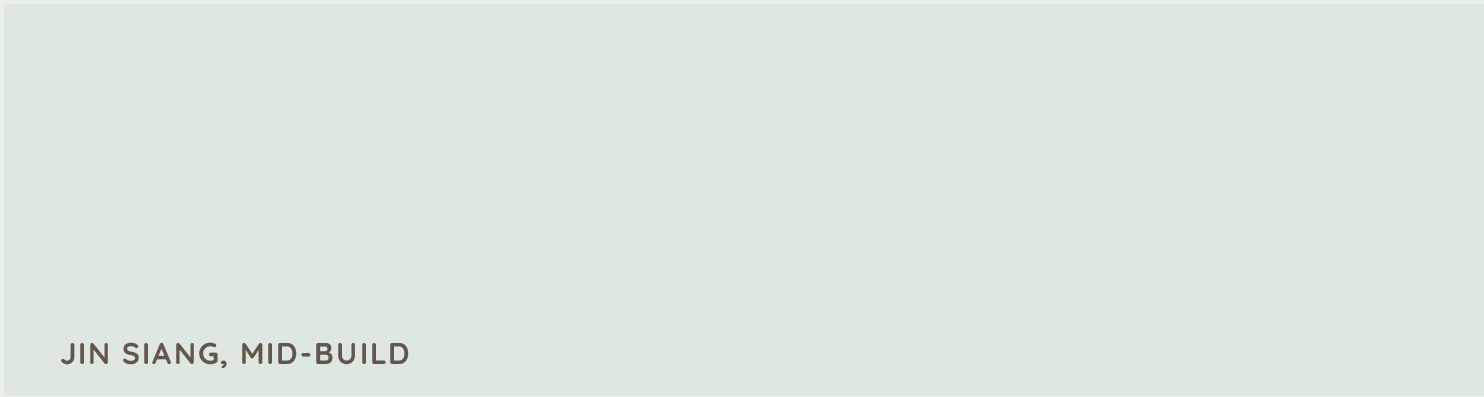

Two We Built, Then Killed

Both worked when they were dropped. One of them demoed better than the thing that replaced it.

DROPPED 2 SEPTEMBER, WHILE IT WAS BUILT AND WORKING

~~Split Planning~~

JIN SIANG, MID-BUILD

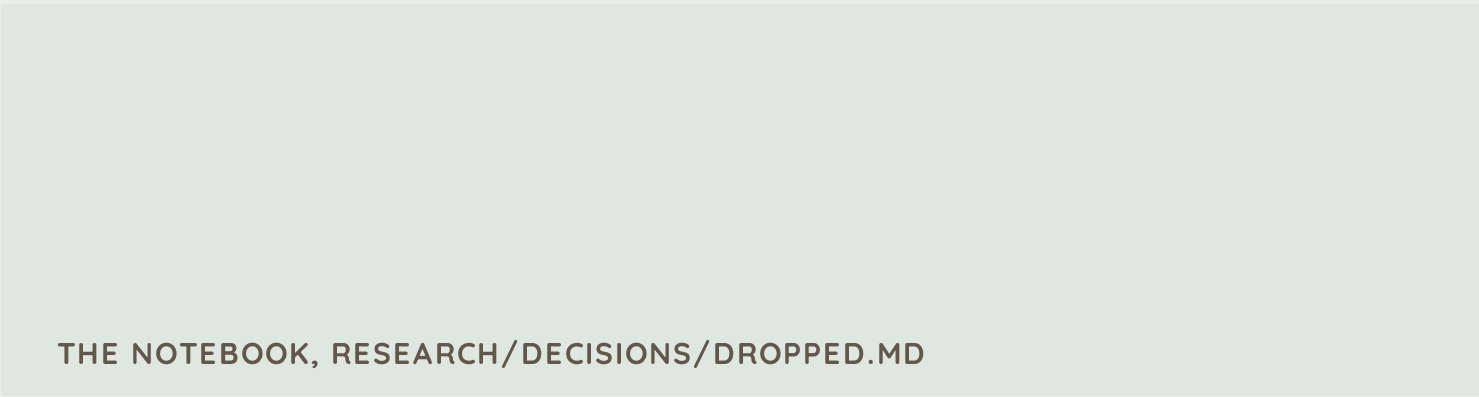

WHY IT DIED

Splitting the work between four people does not remove the work, it distributes it.

WHAT IT COST US

DROPPED 6 SEPTEMBER, WHILE IT WAS BUILT AND WORKING

~~One Book In Two States~~

THE NOTEBOOK, RESEARCH/DECISIONS/DROPPED.MD

WHY IT DIED

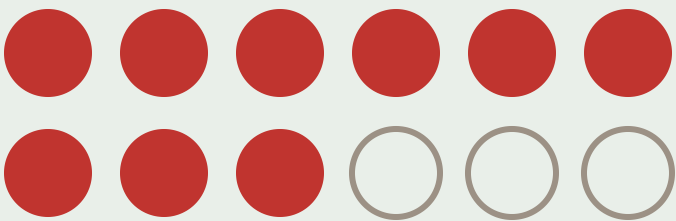

A flipbook is built for reading. Hosting vote widgets inside one fights the format.

WHAT SURVIVED IT

One Session. Four Things Changed.

ZACH KHONG, FULL STACK ENGINEER AT SOLANA FOUNDATION
38 MINUTES, TRANSCRIBED VERBATIM WITH TIMESTAMPS

TEAMS HE MENTORED, AND WHAT THEY WERE BUILDING

Nine of twelve were building a travel planner.

WHAT HE SAID

~~A ranked interview~~

WHAT CHANGED BECAUSE OF IT

A binary swipe on a reel

~~Forms and choice chips~~

Free text first, chips under it

~~A 50-50 split with no answer~~

The owner's swipe weighs 1.5

~~A generic international planner~~

One city, transit modelled

WHAT HE PROPOSED AND WE DID NOT ADOPT

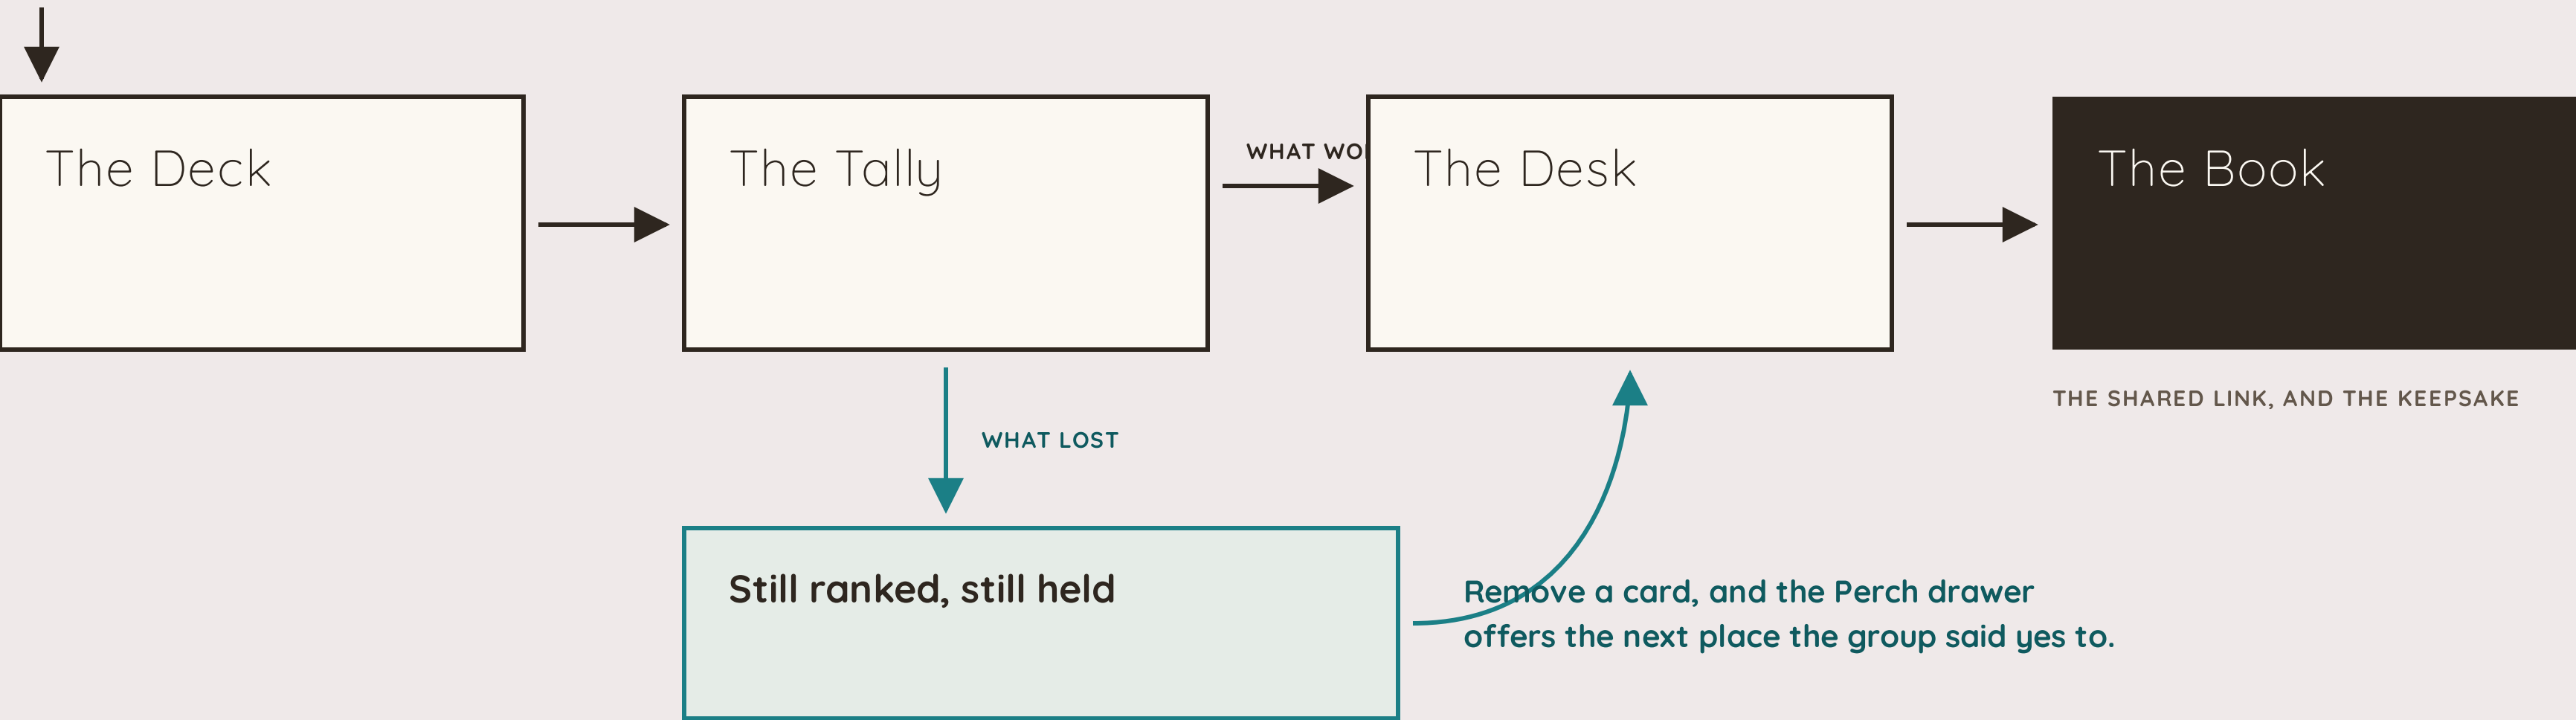

Not built. The binary swipe ships, and the spectrum is the first candidate for the build phase.

THE CONCEPT

One Interaction. Three Surfaces.

The group swipes. The owner drags. The only hands the plan passes through are hers.

THE INVITE LINK OPENS HERE. NO ACCOUNT, NO INSTALL

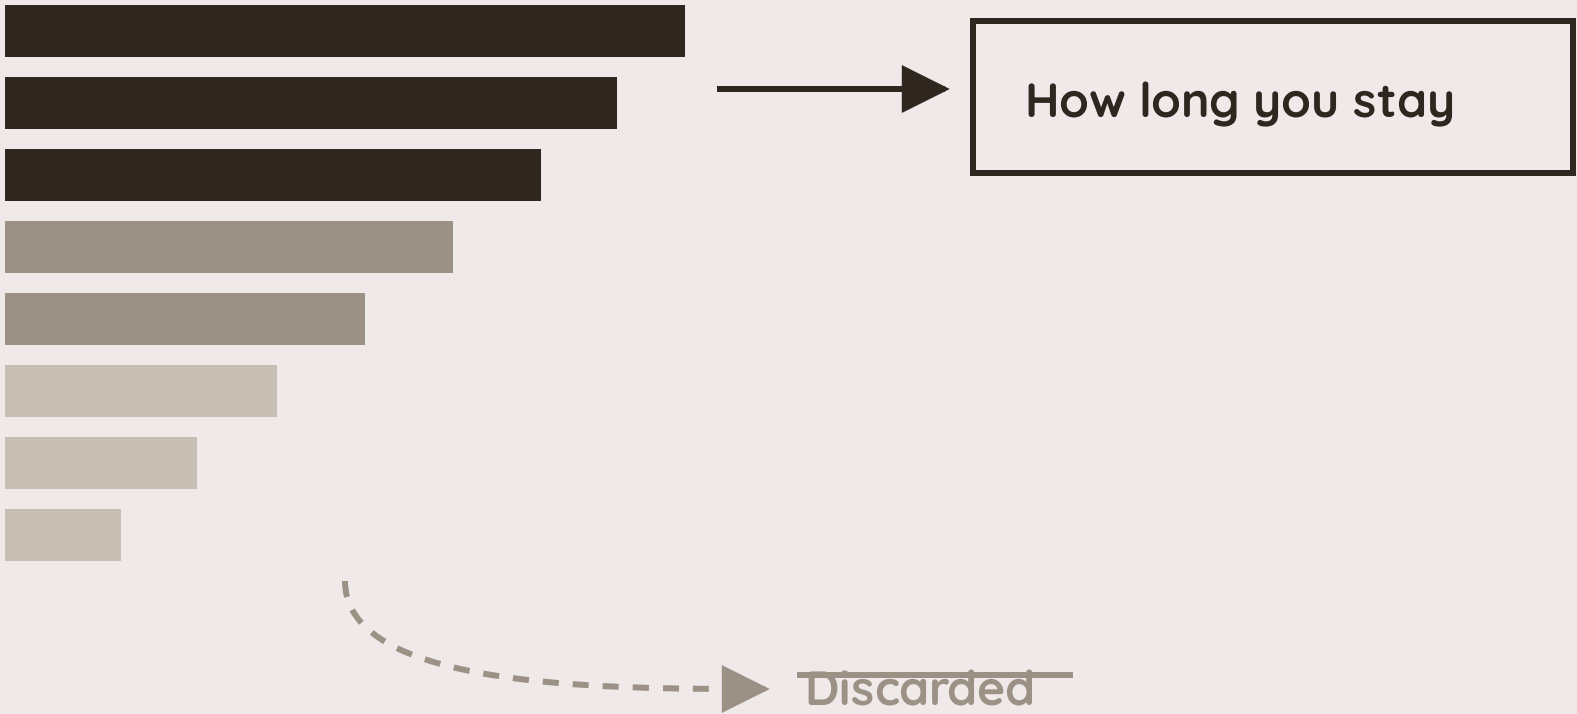

The Ranking Is Spent Twice

A direct competitor had the same ranking in its hands and spent it on a different problem.

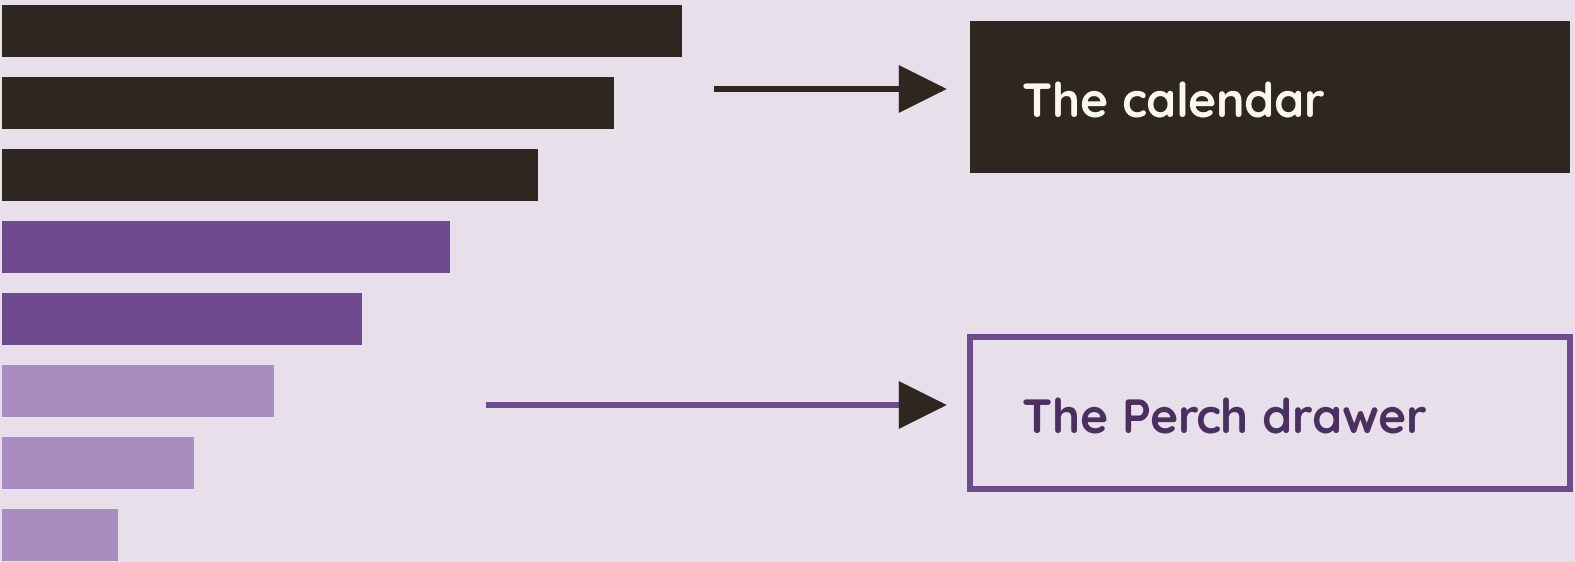

SWIPESIGHTS, READ DIRECTLY ON 7 SEPTEMBER

A ranked group preference order

PERCH

The same ranked order

Spent twice, and both spends are visible.

Where The Field Stops

Three products, and the two free apps that are the real incumbent.

	WANDERLOG	ROADTRIPPERS	SWIPESIGHTS	GOOGLE MAPS AND WHATSAPP	PERCH
Builds an itinerary	☒	☒	☒	☐	☒
Combines group preferences	☐	☐	☒	☒	☒
Keeps the losing preferences	☐	☐	☐	☐	☒
Schedules the votes into routed days	☐	☐	☐	☐	☒
Says in colour whether a day holds	☐	☐	☐	☐	☒
Works with no account and no install	☐	☐	☐	☒	☒

☒ FILLED, IT DOES THIS

☒ HALF, A POLL ONLY

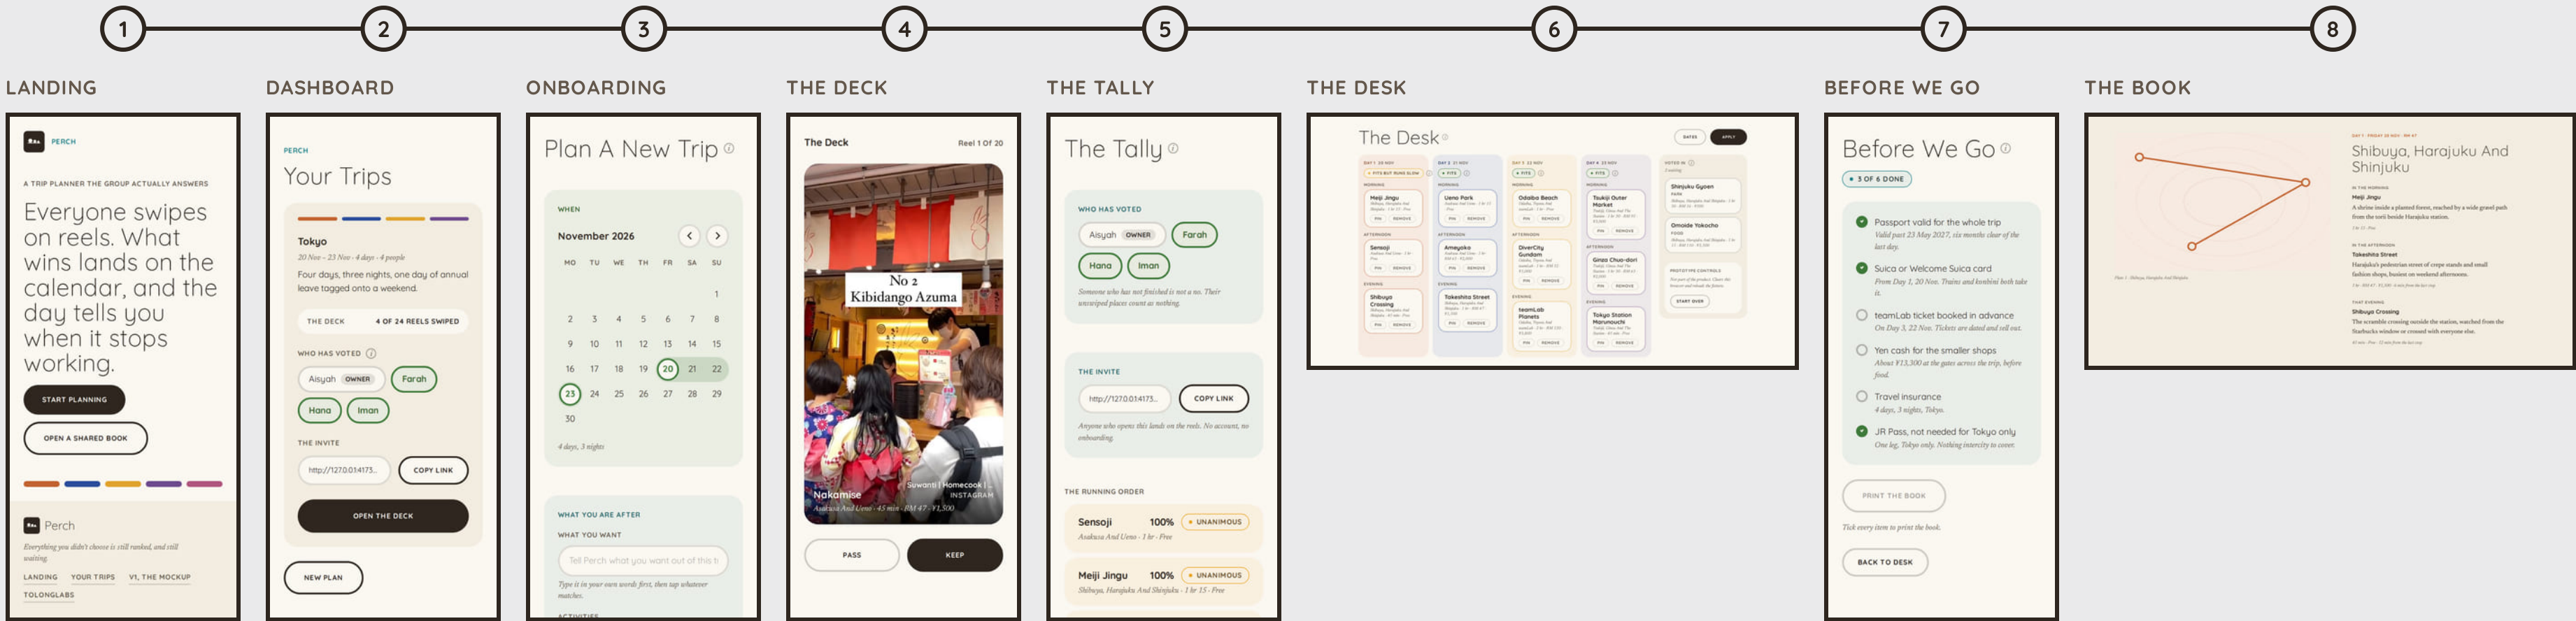

☐ OPEN, IT DOES NOT

☒

THE HONEST RISK

Eight Screens. One Path.

Every frame below is the deployed build, opened in incognito. Nothing here is a static mock-up.

THE MOMENT

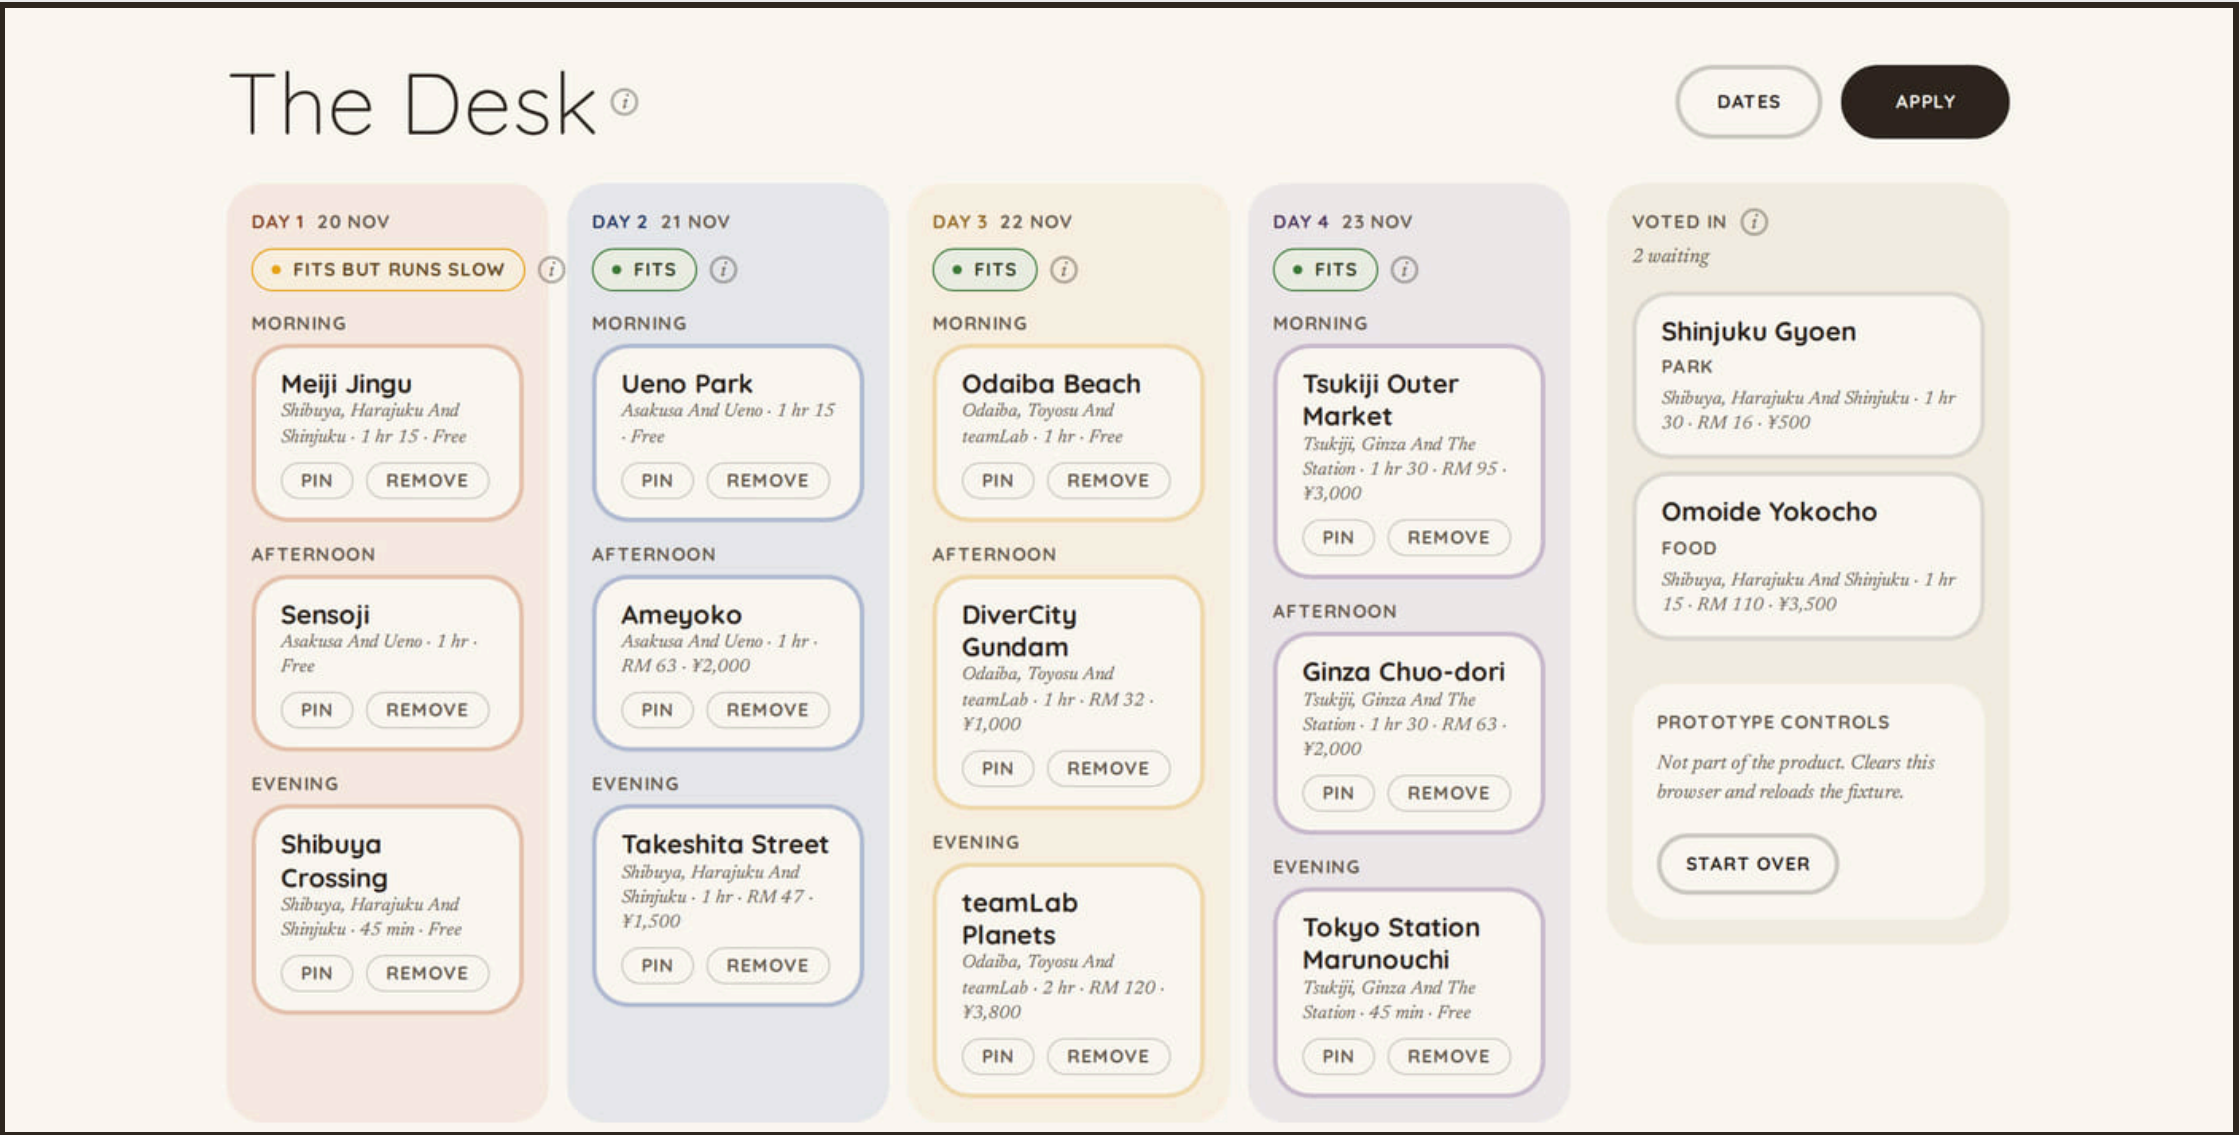

The Day Says What It Did

She drags a stop out of its cluster on purpose. Day 1 turns gold, and the reason is written beside it.

FITS

FITS BUT RUNS SLOW

OVERRUNS

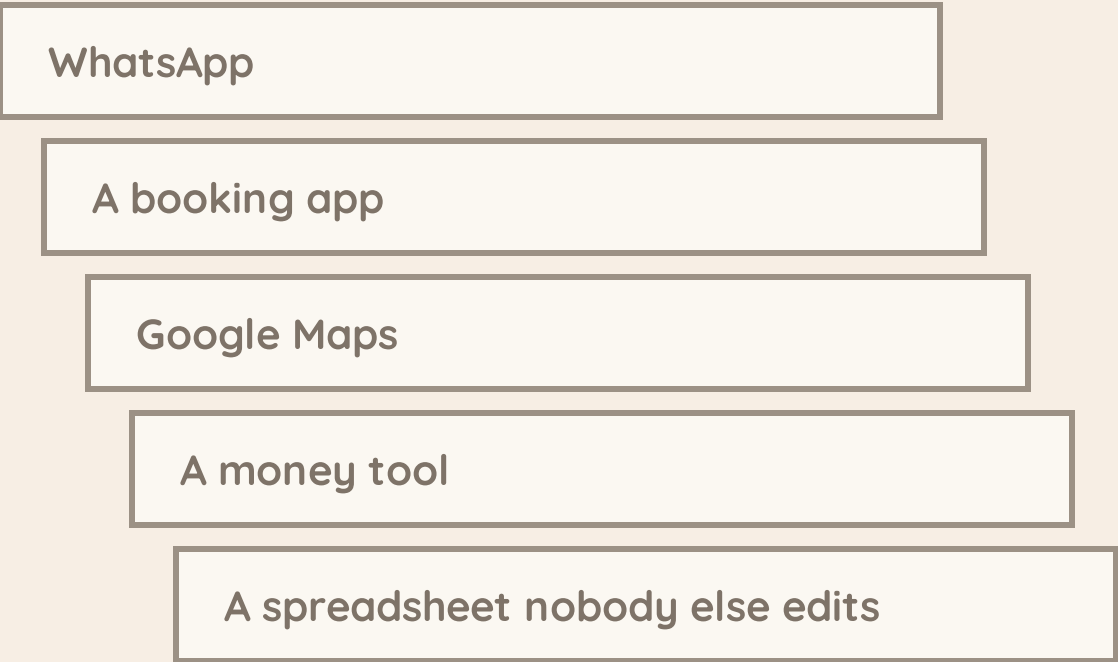

THE DESK, 20 TO 23 NOVEMBER, FOUR DAYS BY THREE SLOTS

Not broken. Slow. The instrument answers back the moment she overrules it, and the call stays hers.

Before, And After

TODAY, IN THE ORDER SHE REACHES FOR THEM

WITH PERCH, AFTER TWO MINUTES OF SWIPING

DAY 1 · FRIDAY 20 NOV · RM 47

Shibuya, Harajuku And Shinjuku

IN THE MORNING

Meiji Jingu
A shrine inside a planted forest, reached by a wide gravel path from the torii beside Harajuku station.
1 hr 15 · Free

IN THE AFTERNOON

Takeshita Street
Harajuku's pedestrian street of crepe stands and small fashion shops, busiest on weekend afternoons.
1 hr · RM 47 · ¥1,500 · 6 min from the last stop

THAT EVENING

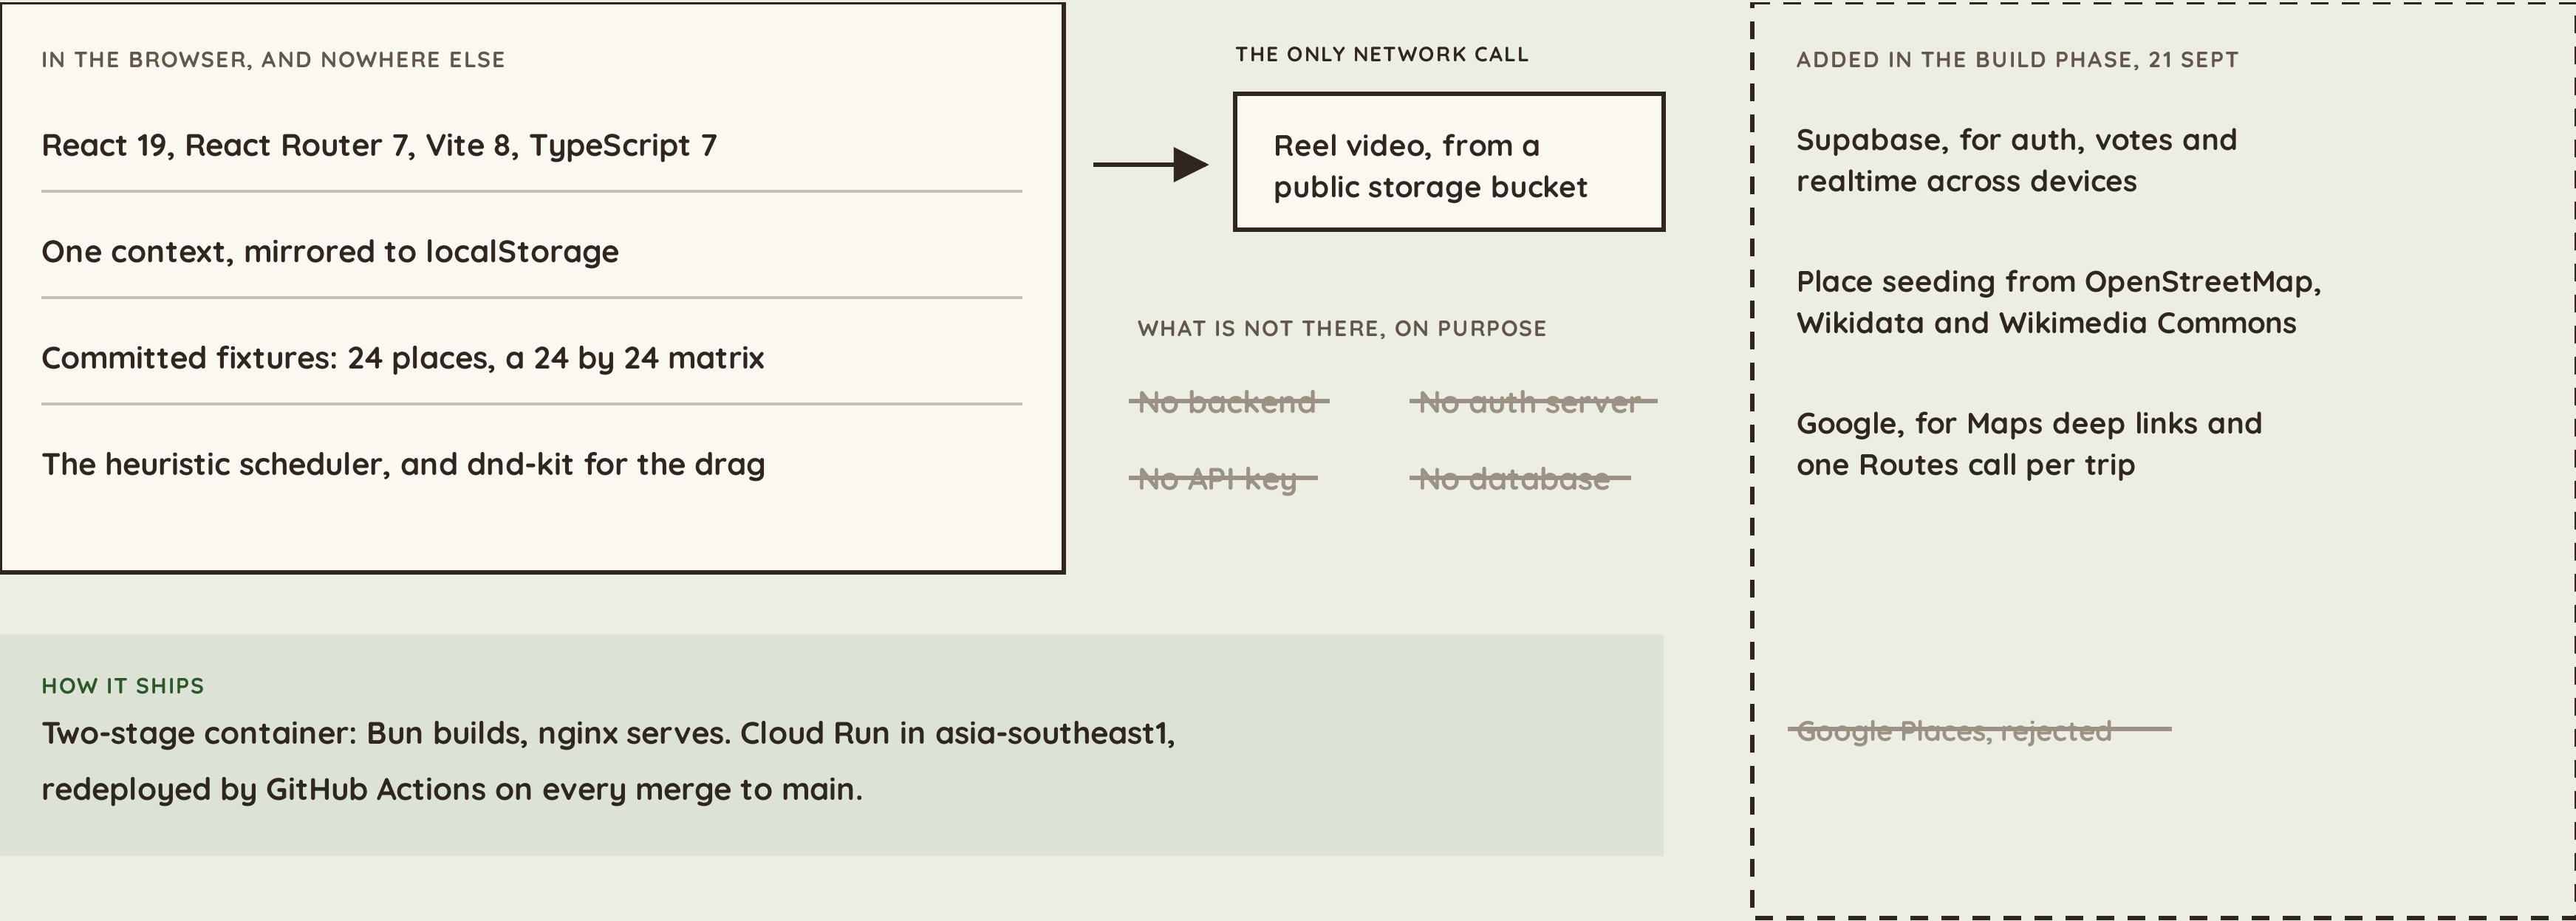

Shibuya Crossing
The scramble crossing outside the station, watched from the Starbucks window or crossed with everyone else.
45 min · Free · 12 min from the last stop

TRANSIT ROUTE

One plate per day, drawing that day’s real route, with a transit link under each. This is what goes back into the group chat.

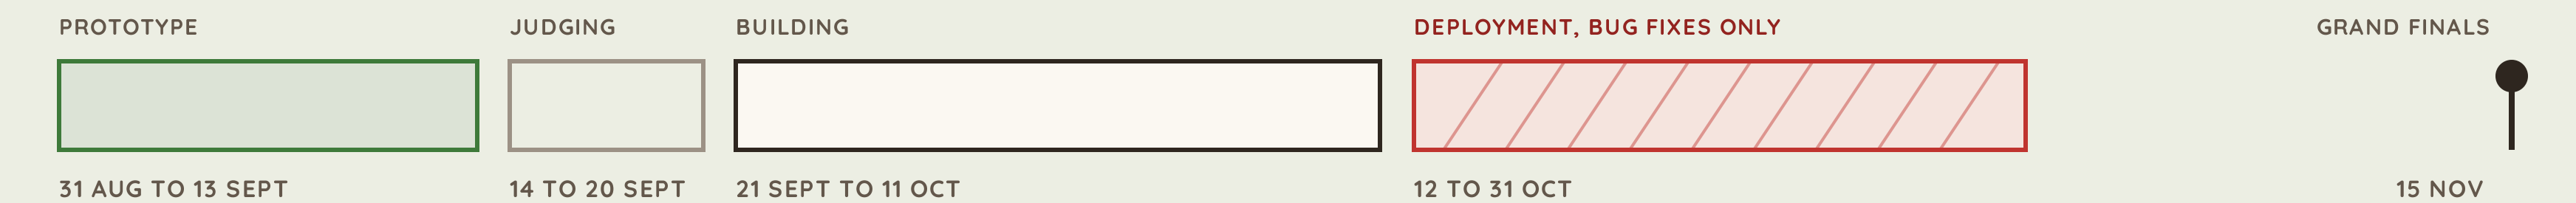

No Backend. No Key. One Network Call.

An unnecessary service is an unnecessary way to fail on stage, so the prototype has none.

Three Weeks, Then Scope Freezes

Deployment is bug fixes only, so week three is the last week scope moves at all.

THE THREE BUILD WEEKS, IN ORDER

WEEK 1

Supabase replaces the fixture for auth and votes

WEEK 2

Seeded place data, behind exactly the same shape

WEEK 3

The Routes call, and the one-line rationale per day

WHAT THE BUILD PHASE WILL NOT BUILD

- Multi-area Japan beyond the legs type
- Native apps
- Any surface outside the nine-route table

WHAT WE HAVE TO SPEND

- Four members, three weeks, one toolchain
- Cloud Run scales to zero, so hosting is free
- Supabase and the place sources are free tier

What A Hundred Planners Already Own

Six things we deliberately do not claim, because the fastest way to sound like every other planner is to claim everything.

~~Better suggestions~~

~~Clever routing~~

~~That generating an itinerary is hard~~

~~Novel group voting~~

~~A new layout~~

~~Photo spots as our territory~~

● THE HONEST GAP, AND IT IS NOT SMALL

The interviews folder is empty. No real person has said any of this, and every claim about the user is marked assumed at its source.

Every tool a group already uses can produce a plan.

None of them turns the
group's decision into days.
